PROFESSIONAL SUMMARY

Detail-oriented healthcare professional with over 7 years of experience in clinical documentation, patient record management, and data accuracy within high-volume hospital and humanitarian settings. Skilled in maintaining confidential records, verifying data completeness, and producing routine statistical reports for medical teams. Currently building applied SQL and Excel skills through self-directed data analysis projects, with a growing focus on structured data entry, database management, and reporting systems such as DHIS2 and Epi Info. Strong record of accuracy, confidentiality, and reliability. Selected for the reserve pool following an MSF (Helmand) recruitment process for Nursing Team Supervisor.

DATA ANALYSIS PROJECTS

GitHub Portfolio — [healthcare-sql-portfolio](#)

- 01-hospital-readmissions: SQL-based exploratory analysis of a hospital readmissions dataset, identifying patterns in patient readmission rates through structured queries and aggregation.
- 02-synthea-ehr (in progress): Analysis of a synthetic electronic health records dataset (Synthea), applied to practice data cleaning and query design for realistic clinical data structures.

WORK EXPERIENCE

Nurse

Emergency NGO · Lashkar Gah, Helmand, Afghanistan

- Maintained accurate, up-to-date patient records and clinical documentation, ensuring completeness and consistency across shifts.
- Coordinated daily nursing activities and supervised junior nurses to ensure continuity and quality of care.
- Monitored compliance with infection prevention and control (IPC) protocols and patient safety standards.
- Compiled and prepared departmental and statistical reports for medical and administrative review.
- Maintained strict confidentiality of patient information in line with facility data protection policies.
- Supported medical stock monitoring and equipment/record tracking.

Professional Nurse

Zubair Hospital · Lashkar Gah, Helmand, Afghanistan

- Provided nursing care for medical and surgical patients, with consistent, accurate documentation of treatment records.
- Ensured adherence to infection prevention and hospital safety protocols.
- Supervised support staff and mentored newly recruited nursing staff on documentation and reporting standards.
